

# Asia-Pacific 2022 in Review

## Tracking Global Events

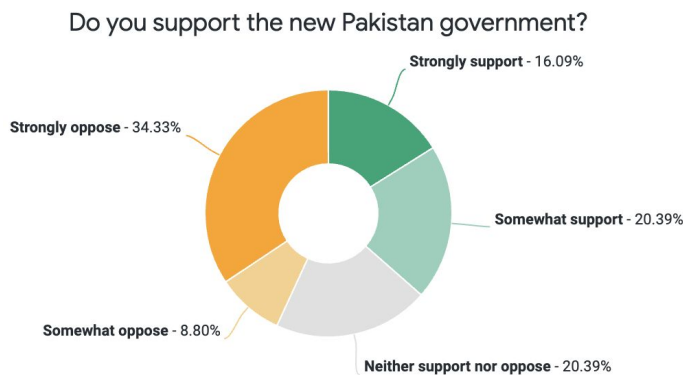

2022 proved to be another eventful year in the Asia-Pacific region. New leaders were elected in Malaysia, South Korea, Pakistan, and the Philippines; economic crises were exacerbated by the effects of the Covid-19 pandemic and the war in Ukraine; Speaker Pelosi's visit to Taiwan marked the most tense period of cross-strait relations between Beijing and Taipei in decades; and natural disasters were just another reminder that the Asia-Pacific region is the world's most disaster-prone. Premise polled the Philippine's presidential election, monitored food prices and shortages in Asia-Pacific economies after the Russian invasion of Ukraine, and tracked the effects of increased Chinese saber-rattling around Taiwan. To track all of this, Premise has created a dedicated space of its website to [rapid-data collection projects in the Asia-Pacific region and beyond](#).

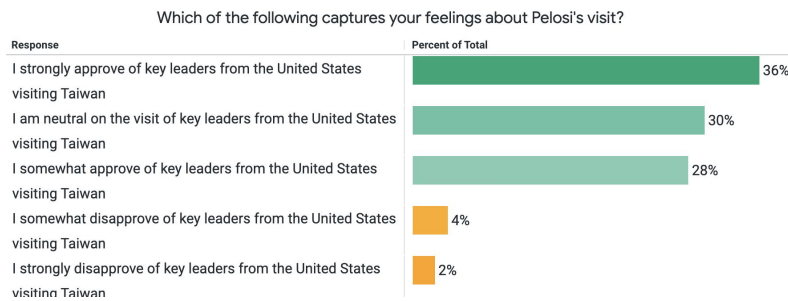

**Premise captured images of flooding in India and Bangladesh in June.**

**Premise correctly predicted the Philippines Presidential election results using randomized stratified samples.**

**Premise gauged real-time rapid sentiment in Pakistan after Imran Khan was removed as Prime Minister.**

**Premise tracked real-time rapid sentiment in Taiwan after Speaker Pelosi's visit to Taiwan .**

## Premise in Action

Premise offers a unique ability to quickly source primary insights from real people on the ground in hard-to-reach places. Over five million people in 138 countries are using the Premise app on their smartphones, enabling our customers to monitor a situation over time and employ a data-driven approach to timely decision-making.
